

NEW SPECIAL ISSUE:
THE EUROPEAN PROGRAMS OF THE “DIRECT FUNDING” 2014/2020

The Commission’s annual and multiannual programming combine the strategic lines and the Commission’s multiannual priorities with specific objectives, in the short- and medium-term, to produce an operational program made of measures to be adopted and objectives to be achieved.

The same method will be used for the objectives of the **“Direct Funding”**, which set the interventions’ prerequisites and limits that have to be achieved on a larger scale, at European level, resorting to public procedures which reward the capacity of making projects and the initiative of **bodies, administrations and private individuals**.

With that **Detailed Special Issue**, conceived and realized at the same time as the **new programming EU 2014/2020**’s launch, the Abruzzo Region intends to complement the framework of services and benefits offered to the citizens and the regional system in order to make the **access to notices** easier.

The notices are provided in **two different versions**. In the first version, the various initiatives are listed according to their **names** and the **types of program**. In the second version, the same initiatives are collected according to their **spheres of activity**, apart from the program.

As a reminder, all the information products of the Liaison Activities with the EU in Brussels are also available **online**, on the **“Abruzzo-Europa”** website, which is now also available in English and in French, at the following address:
